Narrative Report

TOT Inspection Report Overall Narrative Comments: **1250 gallon tank was pumped at the time of inspection. Everything was in good working order at the time of inspection. System has a filter in it that needs to be cleaned yearly. Recommend pumping every three to four years depending on use. Highly recommend not parking, planting, building or allowing livestock on leech field. This inspection in no way makes Harter Custom Pumping responsible for the continued operation of this septic system.**
