Madison County Soil & Water Conservation District

By Tim Palmer, Chairman

TO THE PUBLIC

States: Effective date: 8/20/2002 for motions 127-129 motion 130 adopted August 23, 2004. All PL-566 grade stabilization structures located in the Badger Creek Watershed which are under an easement with the Madison County Soil & Water Conservation District require the following:

A setback measured at a minimum of 75 (seventy five) linear feet from the top of the dam elevation. All PL-566 waterway structures located in the Badger Creek Watershed which are under an easement with the Madison County Soil and Water Conservation District require the following: A setback of 100 (one hundred) linear feet measured from the centerline of the waterway. For a total of 200 feet. No land Disturbing Act or structures may be within setback areas without prior approval of the Madison County Soil and Water Conservation District Commissioners. Examples are as follows: Fences, trees, sidewalks, septic systems, docks, plants, etc., etc., etc. ~~Any drainage way in the Badger Creek Watershed with 1% grade will require placement of a minimum of 14 feet wide bio-mat.~~

AMENDMENT TO THE ABOVE DOCUMENT

Meeting Date:

July 20, 2016

95-16 Moved by Koch to amend the previous document. Seconded by Palmer. Motion carried unanimously. Strike the above bolded statement to read as follows: Any drainage way/swale/water way where land disturbing activity occurs (bare ground is created) should be vegetated immediately and adequate erosion control should be provided until protective vegetation is established.
