Overall condition of the private sewage disposal system _____

Report system status Acceptable- YES

Explain (attach additional pages as needed): All waste water goes from house to septic. 750 gal single compartment tank with lid to the surface and baffle tees and filter in working condition. Plastic distribution box has 2 very minor cracks at the very top of the box that are only maybe .5" and does not effect any working conditions of this box nor leak any water from the box. D-box in working condition. Hydraulic load tested the 2x75ft x 150ft 36" chambers with 200 gal water. Laterals took all water and probed dry and clean.

Site status at conclusion of Time of Transfer inspection:

- Verify that controls are set on the appropriate mode.
- Power is on to all components.
- Revisit all components to verify lids are secure.
- Gather all tools for removal from the site.
- Verify that no sewage is on the ground surface.

Using this worksheet, write a narrative report of the inspection results and attach a site sketch.

This report indicates the condition of the private sewage disposal system at the time of the inspection. It does not guarantee that it will continue to function satisfactorily.
